Dedication

In memory of Paul Evan Peters (1947-1996), founding Executive Director of the Coalition for Networked Information, whose visionary leadership at the dawn of the Internet era fostered the development of scholarly electronic publishing.

Preface

The Scholarly Electronic Publishing Bibliography (SEPB) presents selected English-language articles, books, and other printed and electronic sources that are useful in understanding scholarly electronic publishing efforts on the Internet. Most sources have been published from 1990 through 2008; however, a limited number of key sources published prior to 1990 are also included. Where possible, links are provided to works that are freely available on the Internet, including e-prints in disciplinary archives and institutional repositories. Note that e-prints and published articles may not be identical.

An article about the development and utilization of the bibliography is available:

http://hdl.handle.net/2027/spo.3336451.0007.201

The Open Access Bibliography: Liberating Scholarly Literature with E-prints and Open Access Journals (http://www.digital-scholarship.org/oab/oab.htm), by the same author, provides much more in-depth coverage of the open access movement and related topics (e.g., disciplinary archives, e-prints, institutional repositories, open access journals, and the Open Archives Initiative) than SEPB does.
